

Village of Wellington
115 Willard Memorial Square
Wellington, OH 44090
Water Superintendent Jon Love
(440) 647-3164

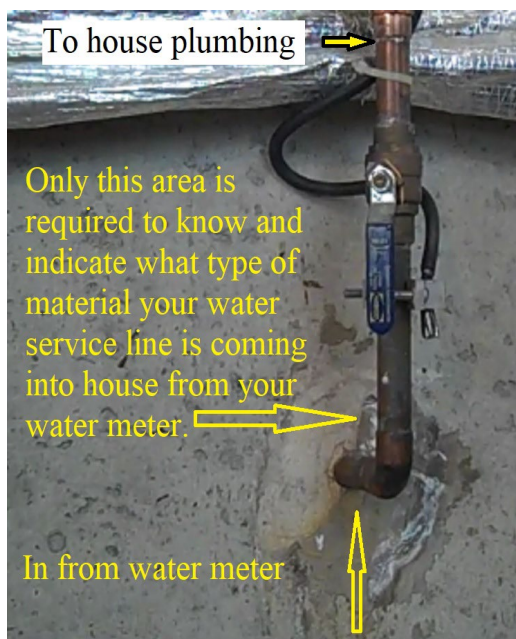

This survey allows the Village of Wellington water customers to determine the material of their water service lines. The results of the survey are dependent on the accuracy of the data filled out and are not guaranteed by the Village of Wellington. Filling out this survey will allow the Village of Wellington to submit the required service line inventory to the EPA, save staff time, minimize their entry into homes, and keep costs lower. This data will be used to satisfy the U.S. EPA's lead and copper rule revisions, which became effective in December 2021. One of the requirements of this revision is that all water utilities record the material of the customer water service lines. Filling out this survey will allow the Village of Wellington to submit the required service line inventory to the EPA.

To complete this survey, you will need a coin, a key or another tool, and a magnet.

Customer Contact information

Account number: _____ Name: _____

Address: _____ Email Address: _____

Question 1: Locate the water service line coming into your home/building.

The service line comes into your home or building from the street. It is typically located in your basement, utility room on the lowest level of the building or in a crawl space. The service line will be connected to the water meter, if you have one. Identify a test area on the pipe between the point where it enters the building and your shutoff valve or water meter. If the pipe is covered or wrapped, expose a small area of metal.

- Were you able to find your drinking water service line?
☐ Yes
☐ No

Question 2: Were you able to perform a scratch test?

Scratch test instructions: Use the coin, key, or another tool to carefully scratch the pipe (like you would a lottery ticket). If your line is painted, you may need sandpaper to clear a small area.

- ☐ Yes
- ☐ No

Question 3: What was the color result after the scratch test?

- ☐ Shiny and silver – Lead
- ☐ Copper colored (like a penny) – Copper
- ☐ Dull and gray – Galvanized
- ☐ Visibly plastic (White and rigid) – Plastic

Question 4: Were you able to perform a magnet test?

Magnet test instructions: Place the magnet on the pipe.

- ☐ Yes
- ☐ No

Question 5: What was the result of the magnet test?

- ☐ The magnet does not stick to the pipe
- ☐ The magnet sticks to the pipe

You have a lead pipe if...

The Scratch Test
...the scraped area is
shiny and silver.

You have a copper pipe if...

The Scratch Test
...the scraped area is copper
in color, like a penny.

You have a galvanized pipe if...

The Scratch Test
...the scraped area
remains a dull gray.

The Magnet Test
...the magnet will not
stick to the pipe.

The Magnet Test
...the magnet will not
stick to the pipe.

The Magnet Test
...the magnet sticks to
the pipe.
